Information Disclosure Statement

Upon a review of the instant application it was noted that the last non-patent literature reference cited in the October 25, 2007 IDS on page 12 (i.e. sheet 11 of 14 of the IDS) did not list a date or year of publication. Based on a review of the cited reference (i.e. Moren, "Aerosols in Medicine, 2nd edition, Elsevier, pp 321-350) it was ascertained that the publication year was 1993. A signed/initialed copy of page 12 of the October 25, 2007 IDS that has been amended to state the publication year of the Moren reference is included with this notice of allowance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance, which incorporates herein by reference the reasons for allowance specified in the allowance mailed on August 28, 2008: Applicants newly filed IDS did not cite any references that changed the previous patentability determination. The closest prior art references were cited in Applicants' 10/31/2008 IDS (i.e. EP 0220958 (EP 558)) and 1/23/2009 IDS (i.e. WO 96/3614 (WO '614)). EP 558 is limited to the preparation of protein compounds comprising a peptide (e.g. pro-insulin) covalently bound to a dipeptide linker comprising proline, which may be appended to a diketopiperazine. There is no motivation to modify the pro-insulin compound suggested by EP 0220958 by the elimination of the dipeptide sequence followed by complexation with diketopiperazine microparticles. Applicants' declaration data demonstrates that the insulin/diketopiperazine particles produced according to the teachings of WO '614 are not the same, as evidenced by their drastically different insulin stability properties. Thus, the claimed method remains is free of the prior art, as determined previously in the allowance mailed on

August 28, 2008. The rejections under 35 U.S.C. § 102(b) as being anticipated by Steiner et al. (WO 96/3614) and under § 103(a) over Steiner and Edelman (WO 96/3614) are withdrawn for the aforementioned reasons. The obviousness-type double patenting rejection over USPN 6,071,497 (which derives from WO 96/3614) is also withdrawn for the aforementioned reasons.
